

**Bertelkamp Automation, Inc.**  
INDUSTRIAL AUTOMATION SPECIALISTS

## Warm Wishes for a Joyous Holiday Season from Bertelkamp Automation

*We will be closed for the holidays on December 25th & 26th and January 1st*

### Festo's NEW Valve Terminal VTUX

Combines the advantages of three classic valve terminals

**Festo is now making it even easier for its users:** the functions of the classic valve terminals CPV, MPA-L/S and VTUG are now available under the umbrella of the convertible valve terminal VTUX. In addition, the AP-I and AP-A communication system creates the ideal platform for digitalized production.

With its high flow rate and almost limitless modularity, the valve terminal fits almost any machine concept. The valve terminal modules can be arranged as required. AP communication technology makes connections child's play, even over long distances. This communication technology creates the prerequisites for safety designs, predictive maintenance and data exchange with the cloud in the Industrial Internet of Things (IIOT).

### Mitsubishi Diamond Elite Distributor Partner

Ensuring exceptional service and solutions

We are pleased to be a Mitsubishi Electric Automation, Inc. Diamond Elite member. Members undergo multi-stage, in-depth training to ensure professionals are kept up-to-date on equipment, new industry technologies and installation best practices. Mitsubishi's solutions provide exceptional reliability, performance, and innovation for various applications.

**DIAMOND  
PARTNER**  
DISTRIBUTOR  
ELITE

As a Mitsubishi Electric Automation Diamond Partner we are empowered through one of the most complete lines of automation products with unmatched performance and quality:

· **PLCs** · **HMIs** · **VFDs** · **Servos** · **Motion Control**

## Ditch those Pumps!

### A clear alternative to Hydraulic Press Systems

Did you ever wonder why manufacturers are moving away from hydraulics?

Is it the noise, smell, leaks, heavy maintenance, plant floor contaminations..... or perhaps all the above?

HyperPress® solutions have a place in virtually every segment of industrial production; from Clean-room, Medical, DoD, Test labs, to Industrial Assembly and Forming applications. Offering (2) Power Unit options – HyperCyl® air/oil, and HyperCyl-EMA® Servo technologies, a “Tooling-Ready TurnKey” cell can be provided in Standard format, or Customized to your exact needs.

Crush your competition by radically decreasing operating costs, maintenance intervals and electricity savings of 13-15%, while also saving floorspace using cleaner technology versus Hydraulics.
