

NEW Pulse Press Electric Actuator

Provides simple power control

IAI's new pulse press is an electric actuator combining a stepper motor and load cell, that is capable of performing power control. It provides a loading repeatability of $\pm 1.0\%$ F.S. (full scale), based on feedback from the load cell.

READ MORE

- Capable of both pushing and pulling
- Less than half the cost of an IAI Servo Press
- Models with push forces from 60N to 2,000N
- Easy setup

Lift100 High-Payload Robot Lift

Enables future-proofed palletizing tasks for robot arms

OnRobot's NEW Lift100 high-payload robot lift long-stroke robot elevator enables a wide range of future-proofed palletizing tasks for leading robot arms.

Designed with minimal deflection to ensure precise positioning even at high speeds, the Lift100 can also be used in any application where additional vertical reach is needed for the robot arm such as stacking of objects or picking/placing parts on shelves or racks.

READ MORE

- **Additional reach for your robot**
- **Long stroke enables a wide range of palletizing tasks**
- **Integrated safety features**

AlphaProx Inductive Distance Sensors

Micrometer precision distance measurement

Baumer's AlphaProx inductive distance sensors provide outstanding measurement accuracy down to the nanometer range. These compact sensors with fully integrated electronics offer end-of-line calibration for minimized serial dispersion.

Comprehensive portfolio:

- Standard cylindrical sensors
- Linearized characteristic curve
- Factor-1 Series
- High-precision, high-sensitivity sensors
- Sturdy sensors for demanding environments
- Compact sensors for limited space installations

IO-Link Solutions

Pioneering communication with IO-Link

From the WAGO I/O System 750 with the 4-port IO-Link master (750-657), to the IP67 I/O System Field, to thePro 2 Power Supply and the electronic circuit breakers – WAGO's top automation solutions speak IO-Link, making them the

ideal choice for the requirements of modern mechanical engineering.

WAGO IO-Link devices work with common fieldbus systems like PROFIBUS®, PROFINET®, EtherCAT® and EtherNET/IP™, making consistent, high-performance, secure networking easier than ever.
