

Vision that Works in ALL Lighting Conditions
Providing greater than 99.99% reliability

Apera AI isn't conventional vision where light has to be carefully controlled for structured lights or lasers to work. This is vision that works in all lighting conditions—bright, dark, outside or in variable conditions—without special equipment.

AI-powered vision software understands every feature of an object with over 1 million simulated cycles to provide 99.99% reliability, even when objects are complex, nested, shiny or transparent. Apera can do this with no special lighting, and an Apera system will work in all ambient light conditions, even outside.

Ergonomic Workstations

We can design custom workstations to fit your specific needs

80/20 provides T-slot aluminum profiles and products to design custom ergonomic solutions for any industry. It is a modular option that allows you to create applications that fit your workforce and processes.

Easily integrated components provide infinite positioning and easy accessibility of accessories such as storage and organization bins, safety controls, bar code scanners, lights, or computer monitors that can be integrated into your frame. Reduce reaching, lifting, and awkward stances through tailored solutions.

High-precision Proportional Valve Terminals
Expanding possibilities for using pneumatics in automation applications

The world's most **compact valve terminal**
for multi-channel pressure control of small volumes

Festo VTEP proportional valve terminal is designed for precise, multi-channel pressure control with low flow rates, often used in applications requiring high accuracy and dynamic response, particularly in industries like electronics, life sciences, and textiles.

The VTEP features a compact design with multiple valve positions allowing for control of up to 10 working channels through pressure or vacuum, with the ability to switch channels in parallel for increased flow rate when needed.

WAGO PRO 2 Power Supplies

Wide range with 12 V, 24 V and 48 V models

WAGO's line of Pro 2 Power Supplies, with units ranging from 120 to 960 W, sets new standards for communication and parameterization flexibility. It also offers energy conversion efficiency of up to 96.3 %.

These power supplies permit fieldbus connection via snap-on type communication modules and feature high-performance TopBoost and PowerBoost capabilities for to reliably ensure system availability.

WAGO EFFICIENT, SUSTAINABLE
